## Join the Fight Towards Inclusivity with Robotics Inclusive

Robotics Inclusive (RI) is a UK-based, community-led organisation dedicated to advancing Inclusion, Diversity, Equity, and Accessibility (IDEA) within the robotics sector. Founded on the belief that innovation thrives in diverse environments, RI connects individuals across career stages, disciplines, and backgrounds to shape a more representative and equitable future for robotics.

Between 2023 and 2025, RI has served the robotics community through a wide array of events, from intimate roundtables on equitable hiring practices to broad-reaching networking events. Some of our initiatives include the “Headshots & Bots” series, career journey mapping, and early-career workshops at national robotics gatherings that combine professional development with community building. By partnering with institutions like the National Robotarium, UK-RAS, and leading universities, RI ensures IDEA principles are embedded in both research and practice.

By celebrating diverse pathways into robotics and fostering allyship across the community, Robotics Inclusive is helping to close the leaky talent pipeline and ensure robotics innovation benefits all of society. This poster will share our journey, highlight successful initiatives, and invite collaboration from those committed to building an inclusive robotics ecosystem.
